

MEASLES VIRUS 1998–2002: PROGRESS AND CONTROVERSY, <i>Glenn F. Rall</i>	343
THE UNCULTURED MICROBIAL MAJORITY, <i>Michael S. Rappé and Stephen J. Giovannoni</i>	369
PATHWAYS OF OXIDATIVE DAMAGE, <i>James A. Imlay</i>	395
GENE ORGANIZATION: SELECTION, SELFISHNESS, AND SERENDIPITY, <i>Jeffrey G. Lawrence</i>	419
MULTIPLE SIGMA SUBUNITS AND THE PARTITIONING OF BACTERIAL TRANSCRIPTION SPACE, <i>Tanja M. Gruber and Carol A. Gross</i>	441
NATURAL SELECTION AND THE EMERGENCE OF A MUTATION PHENOTYPE: AN UPDATE OF THE EVOLUTIONARY SYNTHESIS CONSIDERING MECHANISMS THAT AFFECT GENOME VARIATION, <i>Lynn Helena Caporale</i>	467
ARCHAEOAL DNA REPLICATION: EUKARYAL PROTEINS IN A BACTERIAL CONTEXT, <i>Beatrice Grabowski and Zvi Kelman</i>	487
MOLECULAR GENETICS OF <i>MYCOBACTERIUM TUBERCULOSIS</i> PATHOGENESIS, <i>Josephine E. Clark-Curtiss and Shelley E. Haydel</i>	517
THE BACTERIAL RECA PROTEIN AS A MOTOR PROTEIN, <i>Michael M. Cox</i>	551
DNA MISMATCH REPAIR: MOLECULAR MECHANISMS AND BIOLOGICAL FUNCTION, <i>Mark J. Schofield and Peggy Hsieh</i>	579
KAPOSI'S SARCOMA–ASSOCIATED HERPESVIRUS IMMUNOEVASION AND TUMORIGENESIS: TWO SIDES OF THE SAME COIN? <i>Patrick S. Moore and Yuan Chang</i>	609
THE SECRET LIVES OF THE PATHOGENIC MYCOBACTERIA, <i>Christine L. Cosma, David R. Sherman, and Lalita Ramakrishnan</i>	641
BACTERIAL BIOFILMS: AN EMERGING LINK TO DISEASE PATHOGENESIS, <i>Matthew R. Parsek and Pradeep K. Singh</i>	677

Subject Index	703
Cumulative Index of Contributing Authors, Volumes 53–57	739
Cumulative Index of Chapter Titles, Volumes 53–57	742

## ERRATA

An online log of corrections to *Annual Review of Microbiology* chapters (if any, 1997 to the present) may be found at <http://micro.annualreviews.org/>

# SUBJECT INDEX

## A

- Ax protein
  - phage-induced
  - modifications of host RNA polymerase and, 306
- ABC1* gene
  - Magnaporthe grisea* and, 189
- abdominal* genes
  - gene organization and, 427
- Aberrant transposition
  - transposable elements in filamentous fungi and, 282-83
- Ac* gene
  - transposable elements in filamentous fungi and, 280
- Acidobacteria*
  - uncultured microbial diversity and, 374-75, 379
- Acid stress
  - Brucella* stationary-phase genes and, 65-66
- Acinetobacter* spp.
  - bacterial motility on a surface and, 251
- acpP* gene
  - bacterial membrane lipids and, 205-6
- Acr1* gene
  - Magnaporthe grisea* and, 190
- acropetal* mutant
  - Magnaporthe grisea* and, 190
- Actinobacillus*
  - actinomycetemcomitans* adherence, 35-36
  - bone destruction, 40-42
  - cell cycle inhibition, 37-40
  - cellular mechanisms, 40-42
  - clonal diversity, 34
  - conclusions, 43
  - cytokine induction, 37
  - cytotoxic distending toxin, 39-40
  - extra-oral pathology, 31
  - general characteristics, 31-33
  - genomics, 34-35
  - host cell invasion, 42-43
  - immunomodulation, 36-40
  - introduction, 30
  - leukotoxin, 38-39
  - localized aggressive periodontitis, 30-31
  - periodontal diseases, 30-31
  - racial tropism, 34
  - serological diversity, 33-34
  - systematics, 33-34
- Actinobacteria*
  - uncultured microbial diversity and, 373-74
- Actins
  - vaccinia virus motility and, 323-35
- Actohydroxamic acid (AHA)
  - biofilm pathogenesis and, 681
- Acute infection
  - measles virus and, 352-53
- Adaptation
  - Brucella* stationary-phase genes and, 60-61
- Adaptive immunity
  - Kaposi's sarcoma-associated herpesvirus immunoinvasion and tumorigenesis, 609, 616-18
- Additive effects
  - FtsZ protein assembly dynamics and, 144
- Adenylation
  - nitrogen limitation in *Escherichia coli* and, 161
- Adhesins
  - biofilm pathogenesis and, 687
- Adhesion
  - Actinobacillus actinomycetemcomitans* and, 29, 35-36
- adh* gene
  - gene organization and, 433
- ADP-ribosylation
  - phage-induced modifications of host RNA polymerase and, 305-6
- Aequoria victoria*
  - Mycobacterium tuberculosis* pathogenesis and, 529
- Aeromonas* spp.
  - bacterial motility on a surface and, 251, 255
  - biofilm pathogenesis and, 692
- Aeropyrum pernix*
  - archaeal DNA replication and, 494
- Aflatoxin
  - history of research, 4
- African-origin populations
  - Actinobacillus actinomycetemcomitans* and, 29, 34
- Afu1* element

- transposable elements in filamentous fungi and, 279
- Agaricus bisporus*  
transposable elements in filamentous fungi and, 278-79
- agf* genes  
biofilm pathogenesis and, 690
- Agrobacterium tumefaciens*  
*Actinobacillus actinomycetemcomitans* and, 36  
*Magnaporthe grisea* and, 179  
multiple sigma subunits and partitioning of bacterial transcription space, 447
- Airway infections  
biofilm pathogenesis and, 677, 685-86
- ALB1* gene  
*Magnaporthe grisea* and, 184-85
- Alcaligenes* spp.  
bacterial motility on a surface and, 251
- alc* gene  
phage-induced  
modifications of host RNA polymerase and, 306
- Alkaloids  
history of research, 5
- Alkylation damage  
DNA mismatch repair and, 596-97
- Allelic exchange mutants  
*Mycobacterium tuberculosis* pathogenesis and, 523-26
- amber* gene  
phage-induced  
modifications of host RNA polymerase and, 307
- Amidotransferases  
nitrogen limitation in *Escherichia coli* and, 160
- Amino acids  
history of research, 6-8, 10-11
- Aminoglycosides  
history of research, 1, 8, 10-11, 16, 19
- Ammonia  
nitrogen limitation in *Escherichia coli* and, 155-71
- $\beta$ -Amyrin  
history of research, 5
- Anabaena* spp.  
bacterial motility on a surface and, 251
- Anaerobiosis  
oxidative damage pathways and, 395-413
- Anopheles* spp.  
gene organization and, 428
- Ant1* element  
transposable elements in filamentous fungi and, 280, 291
- antennapedia* gene  
gene organization and, 427
- Antibiotics  
bacterial membrane lipids and, 205, 217  
biofilm pathogenesis and, 679, 681  
history of research, 1, 4, 7-10, 13, 15-20, 22  
*Magnaporthe grisea* and, 179  
tmRNA and, 109-10
- Antirecombination  
DNA mismatch repair and, 590-92
- apaH* gene  
*Actinobacillus actinomycetemcomitans* and, 42
- Apoptosis  
Kaposi's sarcoma-associated herpesvirus immunoinvasion and tumorigenesis, 621-24  
measles virus and, 358
- Appressorium  
*Magnaporthe grisea* and, 177-96
- Aquatic biofilm  
biofilm pathogenesis and, 693
- Aquifex aeolicus*  
tmRNA and, 111
- Aquificae*  
uncultured microbial diversity and, 374-75, 383
- Arabidopsis thaliana*  
multiple sigma subunits and partitioning of bacterial transcription space, 457
- Archaeal DNA replication  
B-type polymerases, 499-500  
Cdc6 protein, 491-93  
conclusions, 506-7  
DNA ligase, 505  
DNA polymerases, 498-501  
D-type polymerases, 500-1  
elongation phase, 495-504  
Flap endonuclease 1, 504-5  
initiation phase, 490-95  
introduction, 488-89  
minichromosome maintenance proteins, 493-95  
Okazaki fragment maturation, 504-6  
origins of replication, 489-90  
overview, 489  
polymerase accessory proteins, 501-3  
primase, 498

- proliferating cell nuclear antigen, 501-2, 506  
 replication factor C, 502-3  
 replication protein A, 496-98  
 RNase H, 505  
 topoisomerases, 503-4  
*Archaeoglobus fulgidus*  
 archaeal DNA replication and, 490, 503-5  
*arg* genes  
 gene organization and, 420, 422, 430  
*Magnaporthe grisea* and, 179  
 Aromatic amino acids  
 history of research, 6-8  
*Archaeobolus immersus*  
 transposable elements in filamentous fungi and, 276, 278-79, 285-86  
*Ascomycota*  
 transposable elements in filamentous fungi and, 280, 286  
*Ascot* element  
 transposable elements in filamentous fungi and, 280, 286  
 AsiA protein  
 phage-induced  
 modifications of host RNA polymerase and, 306-8  
 AsnB protein  
 nitrogen limitation in *Escherichia coli* and, 160  
*Aspergillus* spp.  
 transposable elements in filamentous fungi and, 276, 278-80, 284, 291  
 Assimilation  
 nitrogen limitation in *Escherichia coli* and, 155-71  
*astCADBE* operon  
 nitrogen limitation in *Escherichia coli* and, 165-66  
 ATPase  
 bacterial flagellar assembly and, 77  
 RecA motor and, 556  
 ATP hydrolysis  
 RecA motor and, 551-71  
 Autism  
 measles virus and, 345, 357-58  
 Autoimmunity  
 measles virus and, 345, 356, 358  
 Autoregulation  
 RecA motor and, 558-62  
 Autoxidation  
 oxidative damage pathways and, 399  
 AVR genes  
*Magnaporthe grisea* and, 191, 193, 196  
*Azoarcus* spp.  
 bacterial motility on a surface and, 251  
*Azospirillum* spp.  
 bacterial motility on a surface and, 251, 255, 259
- B**  
*Bacillus* spp.  
 bacterial flagellar assembly and, 80  
 bacterial motility on a surface and, 251, 255-56, 266-67  
 DNA mismatch repair and, 590  
 multiple sigma subunits and partitioning of bacterial transcription space, 446-47  
*Bacillus subtilis*  
 bacterial membrane lipids and, 208-9, 211, 213, 218  
 bacterial motility on a surface and, 255, 266  
*Caulobacter crescentus*  
 cell cycle and, 237  
 DNA mismatch repair and, 583  
 FtsZ protein assembly  
 dynamics and, 128-30, 132, 140, 144-46  
 gene organization and, 428, 431  
 multiple sigma subunits and partitioning of bacterial transcription space, 441, 447, 452-55, 458  
 oxidative damage pathways and, 407  
 phage-induced  
 modifications of host RNA polymerase and, 310  
 tmRNA and, 103, 110  
 Bacterial adhesion  
*Actinobacillus actinomycetemcomitans* and, 29, 35-36  
 Bacterial cell division protein  
 FtsZ protein assembly  
 dynamics and, 125-47  
 Bacterial communities  
 biofilm pathogenesis and, 677-94  
 Bacterial endocarditis  
 biofilm pathogenesis and, 677, 681-84  
 Bacterial membrane lipids  
 CL, 217  
 fatty acid metabolism, 204-6  
 function, 211-17  
 PE, 212-13  
 perspective, 203-4  
 PG, 213-17  
 synthesis, 206-10  
 topology, 210  
 Bacterial stress response  
*Brucella* stationary-phase genes and, 57-71  
 Bacterial transcription space

- partitioning of, 441-58
- Bacteriophage-induced modifications**
- host RNA polymerase and  $\lambda$  protein, 306
- ADP-ribosylation, 305-6
- AsiA protein, 306-8
- bacteriophage  $\lambda$ , 313-15
- bacteriophage N4, 313
- bacteriophage T4, 305-10
- bacteriophage T7, 310-12
- bacteriophage Xp10, 312-13
- conclusions, 316-17
- early transcription, 305-6, 313-14
- Gp2 protein, 311-12
- HK022 protein, 316
- host shut-off, 305-6
- introduction, 302-4
- late expression, 308-9
- late transcription, 314-15
- middle transcription, 306
- MotA protein, 306-8
- nonself, 306
- N protein, 313-14
- Nun protein, 316
- odd T-odd phage, 312-13
- phosphorylation, 310
- RNAP, 302-4
- RNAP  $\alpha$ , 305-6
- RNAP  $\beta$ , 310-11
- self, 306
- SPO1 phage, 310-12
- T4-like phages, 310
- T7 Gp0.7 protein kinase, 310-11
- T7-like phages, 312
- transcriptional regulation, 305-15
- transcription cycle, 302-4
- Bacteroides spp.**
- bacterial motility on a surface and, 251
- oxidative damage pathways and, 412
- uncultured microbial diversity and, 374-75, 381
- bagpipe gene**
- gene organization and, 427
- Basal body**
- bacterial flagellar assembly and, 77-78
- Basidiomycota**
- transposable elements in filamentous fungi and, 280, 286
- B cells**
- Kaposi's sarcoma-associated herpesvirus immunoinvasion and tumorigenesis, 618-19
- measles virus and, 349, 352-53
- BCL-2 protein**
- Kaposi's sarcoma-associated herpesvirus immunoinvasion and tumorigenesis, 621-24
- Bialophos**
- history of research, 22
- Magnaporthe grisea* and, 179
- Biofilms**
- Actinobacillus actinomycetemcomitans* and, 35-36
- aquatic biofilms, 693
- bacterial endocarditis, 681-84
- bacterial motility on a surface and, 249, 264-65
- cardiac valve biofilm, 682-84
- concentration of microorganisms, 687-88
- dental unit water systems, 691-92
- disease pathogenesis, 678-87
- drinking water distribution systems, 691-92
- environmental biofilms as reservoirs for bacterial pathogens, 687-88
- environmental stress, 688-90
- functional biofilm characteristics, 685
- future challenges, 693-94
- infectious kidney stones, 679-81
- introduction, 678
- miscellaneous diseases, 686-87
- morphological biofilm characteristics, 685
- physiological marker of biofilms, 686
- selective pressures, 690-91
- Biogen**
- history of research, 21-23
- Biological weapons**
- oxidative damage pathways and, 395-413
- Biosynthesis**
- history of research, 6
- Bioterrorism**
- measles virus and, 343-44
- Blast fungus**
- Magnaporthe grisea* and, 177-96
- Bleomycin**
- Magnaporthe grisea* and, 179
- Blumeria graminis*
- Magnaporthe grisea* and, 184
- Bone resorption**
- Actinobacillus actinomycetemcomitans* and, 29, 36, 40-42

- Bordetella pertussis*  
*Actinobacillus*  
*actinomycetemcomitans*  
 ard, 36  
 bacterial membrane lipids  
 and, 204
- Borrelia burgdorferi*  
 natural selection and  
 emergence of mutation  
 phenotype, 470, 476  
 oxidative damage pathways  
 and, 403
- Botrytis cinerea*  
 transposable elements in  
 filamentous fungi and,  
 278–79
- Bradyrhizobium japonicum*  
 nitrogen limitation in  
*Escherichia coli* and, 170
- Brain  
 measles virus and, 345,  
 351, 353–55
- Branhamella* spp.  
 bacterial motility on a  
 surface and, 251
- Brocadia anammoxidans*  
 uncultured microbial  
 diversity and, 378
- 5-Bromo-4-chloro-3-indolyl-  
 $\beta$ -D-galactoside  
 history of research, 12
- Brucella* stationary-phase  
 genes  
 acid stress, 65–66  
 adaptation, 60–61  
*B. abortus*, 61–63  
*B. melitensis*, 61–62, 68–69  
*B. suis*, 68–69  
 chronic infection, 59–60  
 conclusions, 70–71  
 defenses, 63–66  
 environmental conditions,  
 60–61  
 genome sequences, 68–69  
 HF-I-regulated genes,  
 62–67  
 homologs of prokaryotic  
 stationary phase genes,  
 68–69  
 host macrophages, 59–61  
 humans, 59–60  
 introduction, 58  
 in vivo phenotype, 61–62  
 killing, 59–60  
 maintenance metabolism,  
 66–67  
 miscellaneous  
 virulence-associated  
 genes, 68  
 natural hosts, 59–60  
 oxidative stress, 63–65  
 phagosomal compartment,  
 60–61  
 physiology, 60–62, 66–68,  
 70  
 quorum sensing, 70  
 resistance, 59–60  
*rpoS*, 69–70  
 virulence, 61–62, 68
- Buchnera* sp.  
 RecA motor and, 553
- BUF1* gene  
*Magnaporthe grisea* and,  
 184–85
- ### C
- Caenorhabditis elegans*  
 gene organization and, 428,  
 432–36  
 history of research, 14
- Caldithrix* spp.  
 uncultured microbial  
 diversity and, 374–75,  
 381
- Campylobacter jejuni*  
*Actinobacillus*  
*actinomycetemcomitans*  
 and, 39
- Cancer  
 DNA mismatch repair and,  
 579, 597  
 Kaposi's  
 sarcoma-associated  
 herpesvirus  
 immunoinvasion and  
 tumorigenesis, 609–29
- Candida albicans*  
 gene organization and, 427  
*Magnaporthe grisea* and,  
 188
- Candidate phyla  
 uncultured microbial  
 diversity and, 369–87
- Candidatus* spp.  
 uncultured microbial  
 diversity and, 378
- Capping proteins  
 bacterial flagellar assembly  
 and, 77, 79, 88–89
- Carbon metabolism  
 nitrogen limitation in  
*Escherichia coli* and,  
 167–70
- Carbonylated proteins  
 oxidative damage pathways  
 and, 406
- Carcinoembryonic antigen  
 (CEA)  
 measles virus and, 358
- Cardiac valve biofilm  
 biofilm pathogenesis and,  
 682–84
- Caseous necrosis  
*Mycobacterium*–host cell  
 interactions and, 651–52
- Catalase  
 oxidative damage pathways  
 and, 395–413
- Caulobacter crescentus*  
 bacterial flagellar assembly  
 and, 93–95  
 differentiation and cell  
 cycle in  
*CckA*, 235–36, 239–40  
 cell cycle, 229–30  
*cis*-acting determinants,  
 242–43  
*CtrA*, 231–39  
*DivL*, 236  
 future research, 243  
 gene expression, 229–34

- global regulation,  
230–34  
introduction, 226–28  
master response  
regulator, 230–34  
multipath network, 239  
overview, 226–28  
PleC-DivJ-DivK  
multicomponent signal  
transduction pathway,  
236–41  
polar morphogenesis,  
229–30  
protein expression,  
229–30  
protein localization,  
239–43  
sensory kinase, 236  
signal transduction,  
235–39  
spatial mechanisms,  
232–34  
temporal mechanisms,  
232–34  
*trans*-acting factors,  
241–42  
FtsZ protein assembly  
dynamics and, 128, 135  
phage-induced  
modifications of host  
RNA polymerase and, 312  
tmRNA and, 116  
*cbi* genes  
gene organization and, 425  
CckA histidine kinase  
*Caulobacter crescentus*  
cell cycle and, 225, 230,  
235–36, 239–40, 242  
CCL5 protein  
measles virus and, 351  
*ccrM* gene  
*Caulobacter crescentus*  
cell cycle and, 234  
CD46 receptor  
measles virus and, 347–49,  
354–56  
Cdc6 protein  
archaeal DNA replication  
and, 491–93  
*cdh* gene  
bacterial membrane lipids  
and, 209–10  
*cdtABC* operon  
*Actinobacillus*  
*actinomycetemcomitans*  
and, 39–40  
Cell cycle  
*Actinobacillus*  
*actinomycetemcomitans*  
and, 29, 37–40  
archaeal DNA replication  
and, 487–507  
*Caulobacter crescentus*  
cell cycle and, 225–43  
DNA mismatch repair and,  
593–95  
FtsZ protein assembly  
dynamics and, 125–47  
Kaposi's  
sarcoma-associated  
herpesvirus  
immunoinvasion and  
tumorigenesis, 624–27  
Cell envelope  
*Mycobacterium*–host cell  
interactions and, 663–64  
Cell polarity  
*Caulobacter crescentus*  
cell cycle and, 225–43  
Cell wall regulator  
*Mycobacterium*–host cell  
interactions and, 663  
Central nervous system  
(CNS)  
measles virus and, 343,  
345, 353–55, 358  
Cereal grains  
*Magnaporthe grisea* and,  
177–96  
Cerulenin  
bacterial membrane lipids  
and, 205  
*Cfi-I* gene  
transposable elements in  
filamentous fungi and,  
277, 279  
*cha-I* gene  
gene organization and,  
432–33  
Chaperones  
bacterial flagellar assembly  
and, 77  
Chaperonins  
*Actinobacillus*  
*actinomycetemcomitans*  
and, 29, 41  
Chemokines  
*Actinobacillus*  
*actinomycetemcomitans*  
and, 37  
Kaposi's  
sarcoma-associated  
herpesvirus  
immunoinvasion and  
tumorigenesis, 616–18  
measles virus and, 351  
Chemotaxis  
bacterial flagellar assembly  
and, 80–81  
*Caulobacter crescentus*  
cell cycle and, 235  
*Chlamydiae*  
uncultured microbial  
diversity and, 374  
Chloramphenicol  
tmRNA and, 109–10  
*Chlorobi*  
uncultured microbial  
diversity and, 374, 381  
*Chloroflexus* spp.  
uncultured microbial  
diversity and, 373–77,  
379  
*Chloronema* spp.  
uncultured microbial  
diversity and, 377  
Chloroplasts  
multiple sigma subunits  
and partitioning of  
bacterial transcription  
space, 455–57

- chp* genes  
bacterial motility on a surface and, 264
- Chromosome location  
gene organization and, 419, 431
- Chromosome replication  
*Caulobacter crescentus*  
cell cycle and, 225, 231, 235
- Chronic infection  
biofilm pathogenesis and, 677  
*Brucella* stationary-phase genes and, 57-71
- Chrysiogenes arsenatis*  
uncultured microbial diversity and, 374, 383
- cis*-acting regulatory sequences  
*Caulobacter crescentus*
